About Venue

Berlin, Germany

Berlin is situated about 112 miles (180 km) south of the Baltic Sea, 118 miles (190 km) north of the Czech-German border, 110 miles (177 km) east of the former inner-German border, and 55 miles (89 km) west of Poland. It lies in the wide glacial valley of the Spree River, which runs through the centre of the city. The mean elevation of Berlin is 115 feet (35 metres) above sea level. The highest point near the centre of Berlin is the peak of the Kreuzberg, a hill that rises 218 feet (66 metres) above sea level. Measuring approximately 23 miles (37 km) from north to south and 28 miles (45 km) from east to west, Berlin is by far the largest city in Germany. It is built mainly on sandy glacial soil amid an extensive belt of forest-rimmed lakes, formed from the Re ewgaitsetres ro fN to hwe Dahme River to the southeast and the Havel to the west; indeed, about one-third of the Greater Berlin area is still covered by sandy pine and mixed birch woods, lakes, and beaches. “Devil’s Mountain” (Teufelsberg), one of several hills constructed from the rubble left by World War II bombing, rises to 380 feet (116 metres) and has been turned into a winter sports area for skiing and sledding.
